Claims 13, 16 and 17 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for treating diseases in which blood-sugar lowering provides a therapeutic effect (see p. 42 of the specification), does not reasonably provide enablement for the other conditions or effects listed in these claims. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to practice the invention commensurate in scope with these claims. The triglyceride lowering effect mentioned on p. 42 is not shown in Table 1. Further that the compounds affect cGMP-PDE has not been shown. Further even if this were shown one of ordinary skill in the art would not know which diseases could be treated. CGDP in claim 16 should be cGMP. The compounds have not been shown to relax smooth muscle, induce bronchodilation, induce vasodilation, suppress smooth muscle cell activity or induce antiallergic activity as recited in claims 13 and 17.
